

Project Assistant @ Energy Systems Research Laboratory | IIT Gandhinagar

At the Energy Systems Research Laboratory in IIT Gandhinagar, we design, simulate and test hydrocarbon based fuel cell system components with a view to improve their efficiency, stability and adaptability. Essentially, we apply principles of fluid mechanics and heat & mass transfer at our one-of-a-kind safety laboratory located on campus. We do both experimental and computational work, because we believe that these complement each other and are both essential to the projects we work on. We have recently started work on an externally funded project involving diesel reforming of hydrogen, and we are looking for **bright, highly energetic and outstanding** individuals to join our team.

You must have (or be close to obtaining) an undergraduate (or graduate) degree in Mechanical or Chemical Engineering and allied branches. We are looking for a holistic application with strong fundamentals, good communication skills, professional work ethics and a demonstrated track record of participating in projects. If you are interested, please see some important information below.

Key Dates

Last date for application (through email)	8 th Feb
Announcement of shortlisted candidates on IITGN website	13 th Feb
Telephonic interview	15 th Feb
Telephonic interview results announcement	16 th Feb
Campus visit (optional) and final selection announcement	23 rd -28 th Feb
Date of joining	1 st March

Selected candidates will be paid a consolidated salary of Rs. 20000 per month. Please download the application from here, and e-mail a **single zipped folder** named as <your last name>_pa_esrl.zip¹ containing:

- (1) Application Form (pdf format)
- (2) Curriculum vitae (pdf format)
- (3) Any additional information (please be brief, in pdf format)

to contractual.engagement@iitgn.ac.in (subject line: "Project Assistant – ESRL"). If you have questions, please contact
