

From sowing to farming, meet the li'l farmers at IITGn daycare

DNA Correspondent @dnaahmedabad

Ahmedabad: The Daycare Centre at IIT Gandhinagar has launched an innovative programme to connect children with the environment. As part of the programme, the students will get engaged in farming and then sell the produce.

In the programme 'Kids Supported Agriculture', the children will be engaged in various interactive sessions so that they get aware of the process of farming, the life cycle of different plants, and efforts put in by the farmers and vendors. Daycare Centre said, "So far, it's proved to be a fun

way for the students. We are planning to grow watermelons and cantaloupe this summer."
